

STAINLESS STEEL CONNECTION

CLEANLINE

The Eisele stainless steel connection is used in areas with stringent requirements for hygiene and easy cleaning. It represents a unique innovation for the supply of compressed air in the direct vicinity of food-stuffs. The connection can also be used for liquid media.

It was designed in strict compliance with the standards of the EHEDG, 3-A SSI., FDA, BfR and European Directive No. 1935/2004.

THE SERIES AT A GLANCE

- All metal components are made of stainless steel 1.4404
- Special seals of EPDM to BfR specifications with FDA compliance
- Cylindrical connecting threads in combination with metric tube sizes
- Other versions, such as elbow connections, are currently under development
- Special solutions on request

THE PROPERTIES AT A GLANCE

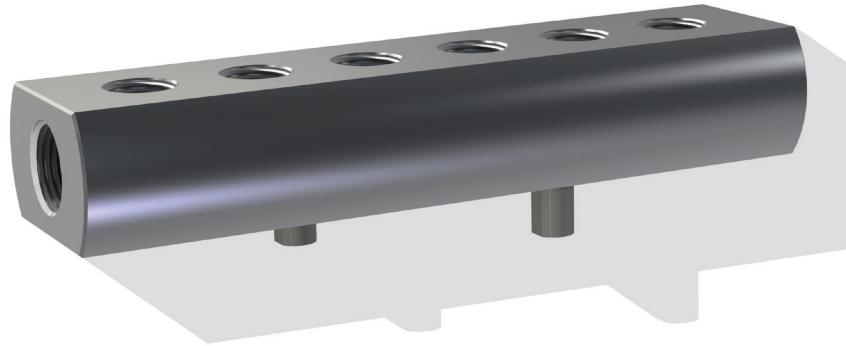

- Fast and easy assembly
- Superior surface quality
- Complete sealing with no gaps or grooves
- Threaded solution for a secure connection, even in the case of vibrations
- Hygienic design for easy cleaning
- Can be used in direct vicinity of food-stuffs and spray applications

MANIFOLD CLEANLINE

Manifold solutions for use in the immediate vicinity of foodstuffs must fulfil special hygiene requirements.

Eisele offers manifolds made of stainless steel 1.4404 that are designed for complete rinsing, however with no liquid remaining on the distributor. The pre-mounted spacers also facilitate mounting.

MEMBER OF EHEDG

In 2015 Eisele became a member of the European Hygienic Engineering & Design Group (EHEDG). The organisation was established in 1989 to increase awareness in industrial enterprises for hygiene in the processing and packaging of foods. The main goal of the group is to contribute to hygiene-compliant construction and design in all areas of food production and therefore to ensure the safe manufacture of foods.
